

Project Acronym : CEUBIOM

Project Title : Classification of European Biomass Potential for Bioenergy Using Terrestrial and Earth Observations

Coordinator : Geonardo Environmental Technologies LTD (Romania)

Website : <http://www.ceubiom.org/project/index.html>

ABSTRACT

The main objective of the project is to develop a common methodology for gathering information on biomass potential using terrestrial and earth observations. This objective will be achieved by the implementation of a systematic assessment work plan and will result in the establishment of a harmonised approach and an e-training tool for dissemination. The e-training environment is an important tool for reaching the much-needed European harmonisation, whereas a Stakeholder Platform facilitates access to reliable and common datasets on biomass potential and as such it offers a more efficient use of the available European biomass feedstock. The project :

- Develop a common methodology for gathering information on biomass potential using terrestrial and Earth observations ;
- Use e-technologies for disseminating information, best practices on the use and applicability of developed harmonised methodology.
