

Project Acronym : BIOGASMAX

Project Title : Biogas Market Expansion to 2020

Coordinator : Lille Métropole Communauté Urbaine (France)

Website : <http://www.biogasmax.eu/>

ABSTRACT

The overall goal of the project is to reduce dependency on oil, reduce greenhouse gases and direct emissions through increased and more efficient production, distribution and use of biogas in the transport sector generated from a wide variety of feedstock available in urban areas and regions in Europe. The project adopts the well-to-wheel approach to identify the potential for efficiency gains and cost optimization to ensure market expansion. During the 4-year life of the project, BIOGASMAX aims to prove the technical reliability, cost-effectiveness, environmental and societal benefits of biogas fuels and perform large-scale demonstrations to optimize industrial processes, experiment and benchmark new and near-to market techniques and expand biogas fleets.
