

Project Acronym : PRACTISE

Project Title : Promoting Reproducible Actions in the Communities to Improve Sustainable Energy

Coordinator : Comune di Alessandria (Italy)

Website : <http://www.energypractise.eu/>

ABSTRACT

PRACTISE is a transnational project supporting the implementation of sustainable energy practices in local communities, in conformity with EU goals. PRACTISE aims at the creation of a Sustainable Energy Community (SEC). SEC's can be defined as Local communities in which politicians, planners, developers, market actors and citizens actively co-operate to demonstrate and develop high degrees of decentralized energy supply, favoring renewable energy sources, together with a conscientious application of energy efficiency measures in all end-use sectors. The main objective will be pursued by the following secondary objectives: Creation of a widespread culture of energetic sustainability sharing and supporting and mobilization of energy local actors; Punctual individuation and campaign against non-technological barriers which obstruct - in the reference territories of the project - a wider energetic sustainability; Rationalization of energy use and promotion of renewable energies use for public and private buildings. The achievement of project objectives will be developed through a participative and methodologically reproducible strategy in other European contexts. The project develops a complex of non-technological actions to favor and share in the local communities more sustainable models of energy use and production. The implementation phase will operate on two fronts: Entity and Territory.

PARTNERS

Comune di Alessandria – **Italy**; Collegio Costruttori Edili ed Affini della Provincia di Alessandria – **Italy**; Association d'Initiatives Locales pour l'Energie et l'Environnement – AILE – **France**; Centre d'Information sur l'Energie et l'Environnement – CIELE – **France**; Conseil Général d'Ille et Vilaine – **France**; Ordine Degli Ingegneri Della Provincia di Alessandria – **Italy**; Provincia di Alessandria – **Italy**; Università degli studi Piemonte Orientale "A. Avogadro", Dipartimento di Scienze dell'Ambient - DISAV – **Italy**; Transport & Travel Research - TTR – **United Kingdom**; Primaria Municipiului Ploiesti – **Romania**; Ayuntamiento de La Coruña – **Spain**; AMAG – **Italy**.
