

**Project Acronym** : RESTMAC

**Project Title** : **Creating Markets for Renewable Energy Technologies - EU RES Technology Marketing Campaigns**

**Coordinator** : EREC

**Website** : <http://www.erec.org/projects/ongoing-projects/restmac.html>

## ABSTRACT

The project aims at developing and implementing a concise, well-targeted and thematic approach to ensure the dissemination and uptake of selected RES technologies in the market. In other words the consortium works towards establishing a technology marketing campaign for the different RE technologies involved.

The project centres on a sectoral approach (WPs 3-7) that deals with the most recent developments in the Photovoltaic, Small Hydropower, Wind, Biomass, Geothermal energy, and Solar thermal energy sectors, and a geographical approach (WPs 8,9, 10). The geographical approach focuses on actions in the New Member States of the EU, in European Islands, and actions outside the EU.

## PARTNERS

European Wind Energy Association - **Belgium** ; European Photovoltaic Industry Association - **Belgium** ; European Small Hydropower Association - **Belgium** ; European Biomass Association - **Austria** ; European Biomass Industry Association - **Belgium** ; European Geothermal Energy Council - **Belgium** ; Agence de l'Environnement & de la Maitrise de l'Energie - **France** ; National Technical University of Athens - **Greece** ; Energy Centre Bratislava - **Slovakia** ; European Solar Thermal Industry Federation - **Belgium** ; GAIA S.L. Consultores en gestion ambiental - **Spain**
